OF EMERGENCY SERVICES

SITUATION SUMMARY

January 2018 Winter Storm (Continued)

Access and Functional Needs

- None reported at this time.

Critical Infrastructure

- On 01/10/18, The National infrastructure Coordinating Center (NICC), Union Pacific Railroad (UPRR) suspended railroad service in Santa Barbara County, at this time there is no estimated time of reopening.
- On 01/10/18, Per California Utilities Emergency Association (CUEA):
 - Southern California Gas (SoCal Gas) advises that a transmission gas line separation occurred in the area above Hwy 192.
 - SoCal Gas is currently awaiting clearance of Hwy 101 at 192 to gain access to assess the line and potentially repair it.
 - SoCal Gas has a temporary isolation of service to Montecito to check lines for safety before restoral of service, this is impacting 3,500 customers.
 - There is no estimated time for restoral of services at this time.
 - Southern California Edison (SCE), reports about 3,400 residences are without power.
 - SCE is awaiting access to the area to repair the downed power lines. SCE reports about 14 service locations that are either damaged or are unable to serve the load in the Montecito. SCE crews are currently conducting damage assessment.
 - A construction coordinator deployed to the County EOC to prepare a priority list for placement of generators.
 - There is no estimated time of restoration provided at this time.
 - AT&T has 1 cell sites down.

Health and Medical

- Per the California Department of Public health (CDPH) as of 01/09/18, the CDPH License & Care (L&C) District Office is in contact with licensed facilities and is monitoring the incident. Facilities are prepared to transfer residents to other facilities if needed.

School Closures

Santa Barbara County:

- Montecito
 - Cold Springs Elementary School District
 - Montecito Union School
 - Private Schools – Crane Country Day and Laguna Blanca Schools
- Carpinteria
 - Carpinteria Unified School District

SITUATION SUMMARY

January 2018 Winter Storm (Continued)

WEATHER OF CONCERN

Weather of Concern

- There is no weather of concern.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A weak Pacific wave will skirt over the region today. Another round of scattered, mainly rain showers, will occur. Snow accumulation levels will generally be above 7000 feet. Amounts will range between 0.5 to 1 inch favoring the North Coast as well as west slopes of the Cascade mountains while portions of the Sacramento Valley will see very little if any precipitation.

The third, in a series of waves will clip the region Thursday into Thursday night. Rainfall will favor the North Coast and NW mountain PSA's with little if any across southern portions of the region. A strong ridge will build over the West Coast Friday and remain into the weekend. Conditions will turn drier and more stable as a result of the ridge. Afternoon temperatures will be above to well above normal during the weekend. A locally breezy and dry N to NE flow will develop late Friday and last into Saturday.

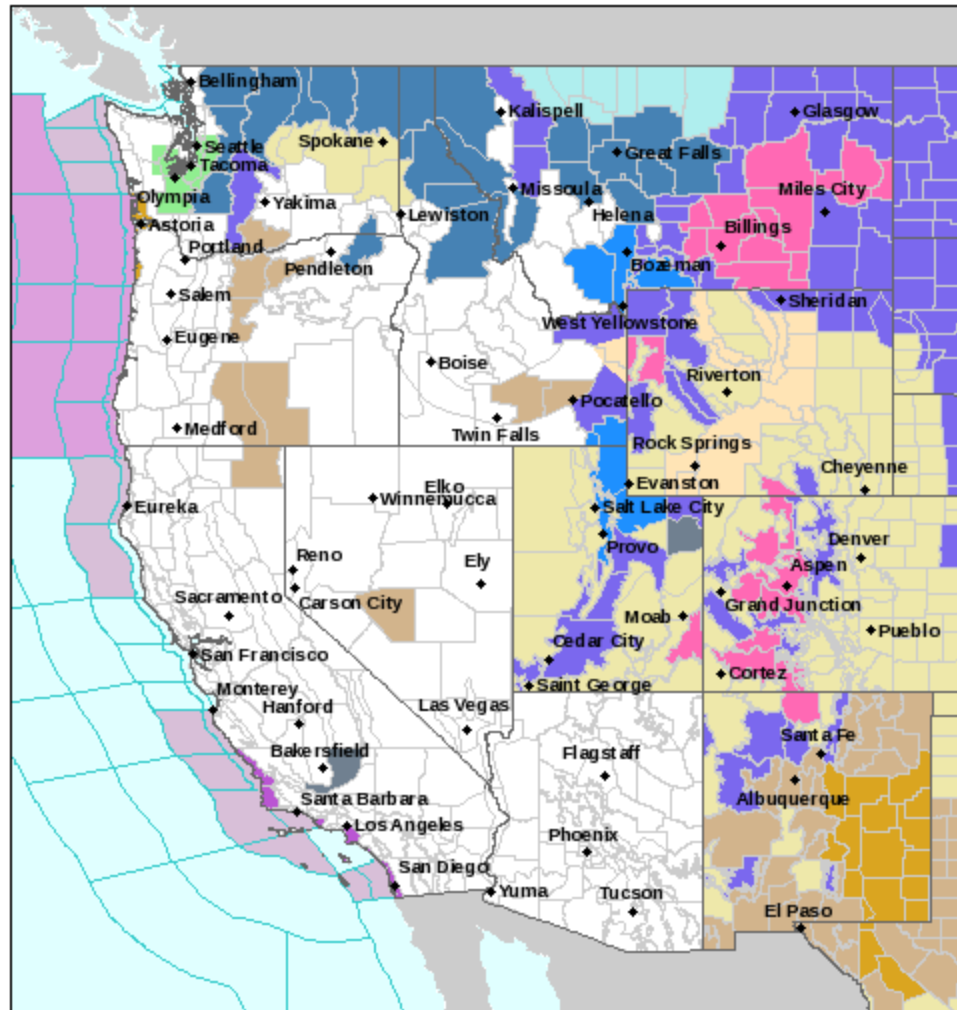

High confidence that the ridge would break down next week. This will allow another series of Pacific waves to provide precipitation chances to the region and more seasonable temperatures. An unusually strong jet could provide strong pre-frontal southerly winds the latter half of next week.

SOUTHERN CALIFORNIA

The back side of a Pacific storm currently located over Northern Arizona will continue to bring scattered light showers to San Diego County this morning. Northwest to north winds of 20 to 40 mph with gusts to 60 mph will surface across most of Santa Barbara County and the Grapevine this afternoon and evening. Temperatures will be near to a little below normal today, with 40s to low 50s across the mountains and mid 50s to mid 60s in the valleys. A strong ridge of high pressure will build into California from the Pacific Ocean bringing around 10 degrees of warming away from the San Joaquin valley and coast Thursday. Minimum humidity will drop to between 15% and 30% across most of the region Thursday. The ridge of high pressure will strengthen Friday and Saturday causing a slow warming trend. A gradual cooling trend will occur Sunday through early next week as the ridge of high pressure weakens. Minimum humidity will be mainly in the teens Friday through this weekend and then increase early next week. There will be local northeast winds of 10 to 20 mph with gusts to 35 mph across the mountains and below the canyons and passes of Southern California Friday evening through Saturday morning.
